Abstract

The aim of this work is ...in four or five lines.

Keywords: *4 to 5 key words maximum*

2010 Mathematics Subject Classification: For example, 65Pxx, 65P20, 65P30.

1 Introduction

Submissions must be

in English, without pagination, and should contain exactly 4 pages.

en anglais, sans pagination et en 4 pages exactement.

2 Main results

2.1 Important information

Abstracts submitted for review must strictly adhere to the template provided to ensure consistency and clarity across all submissions. **Only abstracts that are exactly 4 pages long will be accepted for review.** Abstracts that exceed or fall short of the required length will not be considered. It is essential that authors follow the guidelines for format, font size, margins, and other specifications outlined in the template.

2.2 Figures

To make it easier to use figures in EPS format, we've included two macros that streamline the process. The first macro lets you insert a single figure into your document, while the second lets you combine several images into a single figure.

Figure 1: Title.

2.3 Bibliographie

The bibliography must follow the specific model provided. It is essential that you follow the prescribed structure for citing sources, as this will ensure the consistency of your submission.
