

# Congratulations to the Editorial Team of AJESS included in the Top 2% of World Researchers 2025!

We are delighted to share that several members of the AJESS Editorial Board have been recognized among the World's Top 2% Scientists for 2025.

This distinction is based on the rankings released by Elsevier on September 19, 2025, which assess scientists worldwide using Scopus data. The evaluation considers multiple indicators, including citation counts, h-index, author and co-author contributions, as well as both annual and career-long research performance.

We take great pride in seeing our Editorial Board members featured in this prestigious list both for their career-long scientific impact and for their outstanding single-year research achievements.

## 11 Top 2% Career-Long Scientists 2025
